## Technical Snapshot

**BUY NATURALGAS OCT @ 252 SL 247 TGT 260-265. MCX**

### Observations

Naturalgas trading range for the day is 248.2-267.2.

Natural gas climbed with the amount of gas flowing to LNG export plants back near record highs. Support also seen amid forecasts for cooler weather and higher heating demand over the next two weeks than previously expected.

Average gas output in the Lower 48 U.S. states rose to an average of 103.6 bcf/d so far in October.

LSEG forecast U.S. gas demand, including exports, would hold near 97.7 bcf/d this week and next.

## News you can Use

Divided European Central Bank policymakers opted for raising interest rates at their latest meeting to show resolve in the fight against inflation even though evidence was inconclusive, the account of the gathering showed. The ECB raised its key interest rate to a record high of 4.0% at the Sept 13-14 meeting but signalled that its 10th hike in a 14-month-long effort to bring down inflation was likely to be the last as the economy slowed. The ECB's account of the meeting showed the decision was a "close call" given "considerable uncertainty", with some indicators suggesting a 3.75% deposit rate might have also done the job. But in the end the proposal to raise interest rates by 25 basis point was supported by "a solid majority" of the 26 members of the Governing Council. "Erring on the side of pausing the first time the decision was a close call could risk being interpreted as a weakening of the ECB's determination, especially at a time when headline and core inflation were above 5%," the ECB said. Policymakers noted that "model-based simulations, expert surveys and market pricing" suggested a deposit facility rate in the region of 3.75% to 4.00% would bring inflation back to 2% "as long as it was understood as being maintained for a sufficiently long duration".

Construction output in the UK expanded by 2.3% year-on-year in August 2023, the smallest increase since May, following an upwardly revised 3.2% gain in the previous month and fell short of market expectations, which were at 2.6%. Compared to the previous month, construction output fell by 0.5% in August, after an upwardly revised 0.4% drop in July. Industrial production in the UK shrank 0.7% month-on-month in August 2023, slowing from a one-year low of 1.1% drop in July but coming more than market estimates of a 0.2% fall. Output decreased for three of the four industry groups namely, manufacturing (-0.8% vs -1.2% in July), electricity, gas, steam & air conditioning (-1.8% vs -0.5%), and water supply (-1.6% vs -1.4%). On the other hand, production accelerated for mining & quarrying (2.9%), after stalling in the previous month. Year-on-year, industrial activity rose 1.3%, up from a prior 1% rise and marking the third consecutive month of growth after a year-and-a-half long of successive contractions.
