Technical Snapshot

Gold looks to get support at 150000 and resistance at 166000

Observations

Gold trading range for the day is 152860-160810.

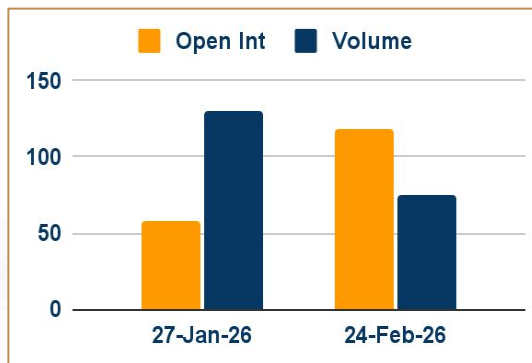

Gold rose supported by fading confidence in US assets, persistent geopolitical tensions, and broader economic uncertainty.

Central bank buying and a broader move away from the dollar have underpinned gold's rise.

Gold premiums in India jumped to their highest in more than a decade, while China premiums dipped.

The National Bank of Poland, approved plans to purchase another 150 tons of the precious metal

Technical Snapshot

Silver looks to get support at 310000 and resistance at 375000

Observations

Silver trading range for the day is 321620-346470.

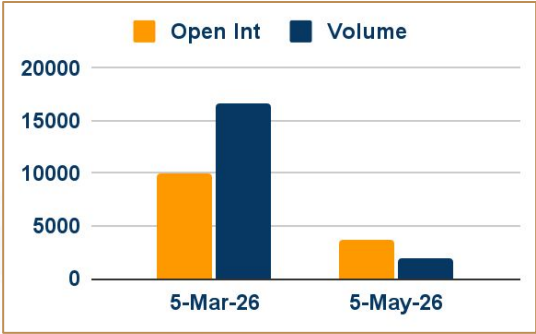

Silver rose driven by robust demand, challenges in scaling up refining of the metal and a persistent supply shortage in the market.

The rally in silver has also been fueled by a historic short squeeze and strong retail buying, as well as China's tightening export controls.

Fed is expected to hold interest rates steady at its January 27–28 meeting, but markets still expect two further rate cuts in the second half of 2026.

The US economy expanded at an annualized rate of 4.4% in Q3 2025, marking the strongest GDP growth since Q3 2023.

Gold dropped on profit booking after prices rise to record high supported by fading confidence in US assets, persistent geopolitical tensions, and broader economic uncertainty. The Fed is expected to hold interest rates steady at its January 27–28 meeting, but markets still expect two further rate cuts in the second half of 2026. EU leaders expressed relief at President Trump's decision to back away from the tariff threat tied to Greenland, while warning they remain ready to respond if similar pressures re-emerge. Trump, meanwhile, said he had secured total and permanent US access to Greenland through a deal with NATO, though details remain unclear, and Denmark reiterated that its sovereignty over the island is not up for negotiation. On the macro front, PCE inflation, came largely in line with expectations in November, reinforcing views that the Fed will keep interest rates unchanged at its meeting next week.

India gold premiums surge to decadal high on import tax hike anxiety - Gold premiums in India jumped to their highest in more than a decade, as investors rushed to buy the metal on expectations of an import duty hike in the upcoming budget, while China premiums dipped as international spot gold prices neared the historic \$5,000 per ounce mark. Bullion dealers charged a premium of up to \$112 per ounce over official domestic gold prices the highest since May 2014. Last week, dealers offered a discount of up to \$12. In top consumer China, bullion traded at premiums of up to \$8 an ounce above the global benchmark spot price this week, up from last week's discount of \$12 to \$3 premium. In Singapore, gold was sold at prices ranging from a \$0.50 discount to premiums of up to \$2 an ounce. In Hong Kong, gold traded at par to premiums of \$1.70, while in Japan, bullion was sold at discounts of \$6 to a \$1 premium, same as last week.

China's PBOC Adds Gold for 14th Month As Prices Hit Record - China's central bank extended its gold-buying streak to 14 months, underscoring sustained official demand for bullion as prices surge to record. Bullion held by the People's Bank of China rose by 30,000 troy ounces last month, according to data. That brings total purchases since November 2024, when the current buying cycle started, to around 1.35 million ounces, or 42 tons. Central banks bought nearly as much gold in late 2025 than they did in the first eight months of the year, according to a research by World Gold Council. The data highlight official-sector demand as a key pillar to support gold prices into this year, as countries continue to see bullion as a hedge against the dollar. Goldman Sachs Group estimated that China added 15 tons of gold to its reserves in September, compared with only around 1 ton of gold the country officially reported.

Central bank gold buying momentum continues into November - Central bank gold demand remained firm in November. Net purchases totalled 45t, with y-t-d figures pushing 297t, as emerging-market central banks continued their significant gold buying this year. Among these central banks, gold holdings for top buyers as a percentage of total reserves showed a wide range. The National Bank of Poland bought 12t this month, continuing its buying streak since October. The purchase lifted its gold reserves to 543t, or almost 28% of total reserves at end-November prices. The Central Bank of Brazil bought gold for the third consecutive month, adding 11t in November. The central bank has purchased 43t over the last three months, bringing its total gold reserves to 172 tonnes, or 6% of its total reserves. The Central Bank of Uzbekistan (10t), National Bank of Kazakhstan (8t), the National Bank of the Kyrgyz Republic (2t), Czech National Bank (2t), the People's Bank of China (1t) and Bank Indonesia (1t) were also buyers in November.

China to Restrict Silver Shipments Starting New Year - China is reportedly set to tighten silver export controls from January 1, widening restrictions on a commodity now seen as vital to U.S. manufacturing and defense supply chains. The Commerce Ministry first flagged the measures in October, coinciding with a Trump–Xi meeting in South Korea, when Beijing agreed to pause certain rare earth curbs as Washington rolled back tariffs. The ministry confirmed 44 companies will be licensed to export silver in 2026–27, two more than last year. The move, framed as a response to U.S. chip curbs and tariffs, also extends to tungsten and antimony, materials vital for defense and advanced technologies. While not a blanket ban, local media quoted an industry insider saying the policy “formally elevates the metal from an ordinary commodity to a strategic material,” placing silver under the same regulatory footing as rare earths.
