FMCG sector valuations (ex-ITC), trending near the last 10Y avg fwd P/E of 49x, are holding up on the hope of demand recovery in $\mathbf{2 H}$ and thus aiding doubledigit earnings ahead, as the margin-led earnings story is largely at play. While we see continued recouping of margin ahead, recovery in demand may require players to pass-on raw-material benefits for accelerating volume growth. Q2FY24 results do not give us enough reason to change our stock calls, but we reduce topline for FY24E due to muted demand. We still prefer GCPL, Dabur, Britannia, ITC, Emami; we avoid Colgate and have a HOLD on HUL, Marico.

Our FMCG universe noted a lackluster topline, but at the back of better margin delivery earnings stood better than expectations. With shift in trade loading from Sep to Oct for the festive/winter portfolios, Q3FY24 topline performance is likely to improve. FMCG players are banking on the trend sustaining beyond Q3. As per AC Nielsen data, the sector's Q2FY24 volume growth is 8.6\%; and we see players increasing focus on volume delivery. Double-digit earnings delivery sustained in Q2, aided by better margin delivery, which is a factor of limited price-cuts in an easing raw-material scenario.

Topline performance muted for our universe; sector growth decent at $\mathbf{9 \%}$ Overall topline show for our coverage universe was subdued, with a low single-digit miss. In Q2, our FMCG universe saw sales growth impact from the festive loading shifting to Q3 and from the price-hike anniversarization. Rural has seen recovery on a low base, but demand rebound is missing. Urban continues to do well on the back of accelerated growth in the modern trade and ecommerce channels. Foods \& Beverages continues to outgrow the Home and Personal-care categories. This is in sharp contrast to the sector growing $9 \%$ (as reported by Nielsen), wherein small and regional players have seen healthy offtake. Unlike Domestic being afflicted by muted demand, International markets are offering FMCG players robust double-digit, constant-currency growth.

Better margin continues to aid earnings
In a muted demand setting amid easing raw-material prices, FMCG companies have largely maintained product prices. This has helped in a better than expected grossmargin delivery. While some players have utilized gross-margin benefits to further A\&P spending, our overall coverage universe has seen healthy EBITDA margin expansion. Improved margin and higher yield have led to better than expected earnings in Q2FY24. Also, higher than estimated non-operating income further aided the earnings delivery.

Double-digit EPS growth firms-up valuation; demand recovery key to re-rating FMCG sector valuations have been range-bound, due to a suppressed topline and marginled earnings. Going into FY25, it would be key for FMCG players to revive topline growth, as margin rebound has largely crowned in FY24. Demand recovery would be a re-rating catalyst, while the slow momentum could trigger a de-rating if margin support diminishes. For our coverage universe, we prefer GCPL, Dabur, Britannia, ITC and Emami. We maintain HOLD on HUL and Marico, while retaining SELL on Colgate.

## Q2FY24 topline performance sub-par

Overall topline performance of our coverage universe was muffled, missing estimates by a low single digit. $\mathbf{Q 2}$ volumes of players in our universe were impacted by the festive-loading shifting to $\mathbf{Q 3}$ and by price-hike anniversarization. Rural business has seen a recovery on a low base, but demand rebound is missing. Urban business continues to prosper on the back of accelerated growth in the modern trade and ecommerce channels. Foods \& Beverages continues to outgrow the Home and Personal-care categories. This is in sharp contrast to the sector growth at $\mathbf{9 \%}$ reported by Nielsen, wherein small and regional players have seen healthy offtake. Unlike in the dampened demand setting in Domestic markets, FMCG companies have seen a robust double-digit, constant-currency growth in the International markets.

## Rural demand outlook remains elusive

Unlike expectations of accelerated rebound in demand for Rural, trends have broadly remained firm QoQ. Monsoon-deficient states have seen weakness in consumer sentiment, leading to slow recovery in demand.

Exhibit 3: Southwest monsoon - Deviation from normal (for the Jun-Sep period)

## Delayed festive this year hits trade loading; to benefit Q3

The festive period, which is in general concentrated in Sep-Oct, has seen a shift to the OctNov period in CY2023. As per the management of Dabur, due to this 20-day shift, related stocking has happened in Oct-23 vs Sep-22 in the base year, thus leading to lower sales YoY.

We believe this shift is likely to help in a better delivery in Q3FY24. Additionally, winter-related stocking has also shifted to Q3 this year, where we see additional benefits flowing through. We see an optically better topline growth in Q3 which companies would look to maintain in the following quarters, in our view.

## Still awaiting volume recovery

Volume growth for our coverage companies has been subdued owing to: i) muted demand setting, ii) shift in loading for the winter season and festive stocking, and iii) surge in local competition. As highlighted above, Q3 is likely to reflect better volumes, but sustaining momentum in the following quarter would be crucial, in our view.

Source: Company, Media (sourced from AC Nielsen), Emkay Research
Performance of large listed FMCG companies has been sub-par in comparison with the sector growth rebound, wherein sales grew $9 \%$ with $8.6 \%$ volume growth, as per AC Nielsen.

Exhibit 7: Quarterly volume growth trends for the FMCG sector

Source: Nielsen, Emkay Research

## Local competition continues to corner share

With the raw material situation normalizing, local competition has seen a surge. Better pricing from regional players has made consumers downtrade in select categories, where large corporates are yet to effect price-cuts. This phenomenon is largely visible in non-food categories, as per AC Nielsen.

Some category incumbents believe price-cuts are unlikely to help volume growth and have used this as an opportunity to recoup gross margin. In our view, as volume rebounds (suggested by AC Nielsen data), FMCG will pass-on the raw-material benefits and accelerate the pace of growth.

Exhibit 8: Resurgence of small players in Tea and Detergent bars

## Source: Hindustan Unilever

■ HUL: $60 \%$ of the business saw value-share gains, while $>75 \%$ of the business witnessed share gains in volume terms.

■ Marico: 85\% of the portfolio either sustained or gained market share and penetration on MAT basis.

## Food continues with a faster growth pace; catchup seen in Non-Food

Food companies continue to clock better growth vs Home and Personal-care companies which, in our view, is mainly owing to elevated prices of raw material like wheat and milk. Also, post Covid, shift in the consumption trend has been more favorable for packaged-food offerings. Categories like spices, wheat flour, edible oil, chocolates and coffee have seen accelerated growth. We believe continued tailwinds will support food companies register better growth.

As per AC Nielsen, Food categories saw $8.7 \%$ volume growth in Q2FY24 (vs. >2\% growth in Q3CY22 and $>8.5 \%$ in Q2CY23). Non-Food category volume growth saw steady improvement to $8.4 \%$ YoY in Q3CY23 (vs. $-6.5 \%$ in Q3CY22 and $+5.4 \%$ in Q2CY23). Rural market volume growth for Non-Food categories stood at $6.7 \%$ YoY (up from 1.4\% in Q2CY23). Personal-care category volume growth turned positive for the first time in Rural. Smaller players are growing relatively faster in the Non-Food segments.

Exhibit 9: Quarterly volume growth trend in Food and Non-Food categories

Source: AC Nielsen (Sourced from media reports), Emkay Research
As per AC Nielsen, impulse food segments (like salty snacks, chocolates, and confectionary) sustained strong growth in Q2FY24, while growth recovery (after a gap of five quarters) is seen for habit-forming categories like biscuits, tea, noodles, coffee, etc.

## Trade-related stress persists

The general trade part of the business has been under stress amid easing product prices. In select categories like Soap and Edible oil-where companies have effected price-cuts, distributors are seeing diminishing returns on investment. This has an impact on the investment by distributors, who have reduced the number of credit days for retail partners. This has a bearing on secondary sales for players.

## Exhibit 10: FMCG supply chain overview

## International growth decent

With an improving macro setting and distribution issues now resolved, FMCG companies have noted better growth in international business. Constant-currency growth has logged in double digits for most coverage companies. GCPL reported growth moderation in Q2 to 2\%; this is a factor of the devaluation in Naira-in constant currency terms, growth has been in double digits. Going ahead, managements across companies are positive on the international business outlook.

## Margins aid in Q2 earnings beat

FMCG companies have largely maintained product prices, in spite of the stifled demand setting amid easing raw-material prices. This has helped in better-thanexpected gross-margin delivery. While some players have utilized gross-margin benefits for increasing their A\&P spending, most coverage companies have seen healthy EBITDA margin expansion. Better margin and higher yield have aided better than expected earnings in Q2FY24. Additionally, higher than estimated nonoperating income further aided the earnings delivery.

## Limited raw material benefit pass-through

While FMCG companies have been proactive in taking price hikes in an inflationary setting, to pass-on the burden to the consumer, players in the deflationary phase are watchful of any price correction. Categories like Biscuits, where the category leader has taken cumulative $22 \%$ price hikes, have effected $1.5 \%$ price cuts in a deflationary setting.

Given that the price correction is unlikely to help volume growth in a weak demand setting, recouping gross margin is prudent. With the expected volume recovery in Q3FY24, it would be interesting to note how companies balance volumes and margins.

Exhibit 16: Domestic realization growth for FMCG companies (YoY)

## Spot raw material continues to see moderation

The overall raw-material situation is much more comfortable now, wherein players have been gradually recouping gross margin. In the food basket, milk, wheat and sugar have maintained elevated raw-material prices, while the rest has seen moderation from peak levels. In the nonfood basket, prices of LLP have been holding up well, while prices of the remaining raw materials have seen moderation from their peak.

Exhibit 17: Key food raw material prices and movement over different time periods

## Accelerated A\&P needs in the business

Amid the surge in competition, sustained new launches and expected recovery in demand, FMCG companies have enhanced their A\&P spending in Q2FY24. Healthy gross margins have aided recovery in A\&P spending.

## Liquidity aids higher other non-operating income

On the back of healthy liquidity and higher yields, FMCG companies have seen growth acceleration in 'other non-operating income' which partially drove the earnings outperformance in Q2FY23.

## Outlook hinged on demand recovery

Managements' outlook remains positive, based on expectations of rebound in structural growth. The Rural demand setting has seen gradual improvement, but lacks acceleration. This was further affected by monsoon-rainfall deficiency. The Urban demand scenario looks stable and is likely to aid overall growth. Margin is likely to see expansion over the next couple of quarters, and aid growth in earnings.

## Q3FY24 to be optically better; demand sustenance key

As highlighted in the aforementioned sections, Q3FY24 is likely to be a strong quarter, from the FY24 quarterly-results perspective. Festive- and winter-related loading is likely to aid companies' volume growth. Acceleration in future demand is key, and any slowdown will have a bearing on topline performance. For their domestic business, companies are hopeful of demand recovery, while staying confident of sustaining double-digit, constant-currency growth for their international business.

## Monsoon deficit has a bearing on Rural

Monsoon rainfall this year stood 6\% lower vs the long-period average. FMCG companies have called out that rain-deficit states are more pressurized than other states. Over the next couple of quarters, improvement in sentiment would be key, wherein elections could come handy, in our view. The recent GoI announcement of free food grain supply continuing for the next five years is comforting, and would support any medium-term demand weakness. As regards Rabi crops, we may see continued stress, given lower reservoir levels.

Exhibit 30: Annual rainfall deficit vs long-period average (for the Jun-Sep period)

^ Includes income from cultivation, livestock rearing and wage from agricultural labour. Figures are for net income after deducting expenses incurred towards pursuing income generating activities like cultivation, livestock rearing and other enterprises

High MSP to aid better realizations
Ahead of the elections, the government has enhanced MSP rates for both, Kharif and Rabi crops. Despite the climate disturbance, farmers have been able to sustain income levels even in the face of weaker output in the past Rabi crop season. Kharif output is currently ongoing and has so far seen a mixed response, as per media articles.

## MNREGA demand remains buoyant-High capex to aid

Government infra spending has been firm, which helps in generating employment. This works as a better structural demand enabler than any tactical measure. Compared with the Budget estimate of Rs6trillion, spends on MNREGA have already crossed the Rs7.7trillion mark, as of Oct-23. Per media reports, the government is looking to allocate extra funds to the scheme, which in our view will be positive for the rural economy.

■ Budget Actual

Source: Media, Emkay Research

* Budget data for FY24, but actual data is for Apr-Oct '23

## Modern retail channels continue to do well

FMCG companies have maintained a positive outlook on modern retail channels like modern trade and ecommerce. These channels largely being used by formal industry participants paves the way for formalization in the sector.

## Valuations ask for structural growth recovery

FMCG sector valuations (ex-ITC at 51x PE) have been hovering near the 10-year historical average forward PER of 49x. Despite the volume weakness, sustained valuation has been a factor of double-digit earnings delivery driven by the margin recovery. As companies look to recoup margin in FY24, we see the need for volume recovery in FY25 for upholding the doubledigit earnings growth momentum.

Q3FY24 is likely to see an uptick in structural growth on the back of in festive loading (shift from Q2), wherein sustenance of momentum would be key. FMCG companies are hopeful of the recovery sustaining beyond Q3FY24. In our coverage universe, we prefer GCPL, Dabur, Britannia, ITC and Emami. We maintain HOLD on HUL and Marico, while maintaining SELL on Colgate.

## GENERAL DISCLOSURE/DISCLAIMER BY EMKAY GLOBAL FINANCIAL SERVICES LIMITED (EGFSL):

Emkay Global Financial Services Limited (CIN-L67120MH1995PLC084899) and its affiliates are a full-service, brokerage, investment banking, investment management and financing group. Emkay Global Financial Services Limited (EGFSL) along with its affiliates are participants in virtually all securities trading markets in India. EGFSL was established in 1995 and is one of India's leading brokerage and distribution house. EGFSL is a corporate trading member of BSE Limited (BSE), National Stock Exchange of India Limited (NSE), MCX Stock Exchange Limited (MCX-SX), Multi Commodity Exchange of India Ltd (MCX) and National Commodity \& Derivatives Exchange Limited (NCDEX) (hereinafter referred to be as "Stock Exchange(s)"). EGFSL along with its [affiliates] offers the most comprehensive avenues for investments and is engaged in the businesses including stock broking (Institutional and retail), merchant banking, commodity broking, depository participant, portfolio management and services rendered in connection with distribution of primary market issues and financial products like mutual funds, fixed deposits. Details of associates are available on our website i.e. www.emkayglobal.com.
EGFSL is registered as Research Analyst with the Securities and Exchange Board of India ("SEBI") bearing registration Number INH000000354 as per SEBI (Research Analysts) Regulations, 2014. EGFSL hereby declares that it has not defaulted with any Stock Exchange nor its activities were suspended by any Stock Exchange with whom it is registered in last five years. However, SEBI and Stock Exchanges had conducted their routine inspection and based on their observations have issued advice letters or levied minor penalty on EGFSL for certain operational deviations in ordinary/routine course of business. EGFSL has not been debarred from doing business by any Stock Exchange / SEBI or any other authorities; nor has its certificate of registration been cancelled by SEBI at any point of time.
EGFSL offers research services to its existing clients as well as prospects. The analyst for this report certifies that all of the views expressed in this report accurately reflect his or her personal views about the subject company or companies and its or their securities, and no part of his or her compensation was, is or will be, directly or indirectly related to specific recommendations or views expressed in this report.
This report is based on information obtained from public sources and sources believed to be reliable, but no independent verification has been made nor is its accuracy or completeness guaranteed. This report and information herein is solely for informational purpose and shall not be used or considered as an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments. Though disseminated to all the clients simultaneously, not all clients may receive this report at the same time. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. EGFSL and/or its affiliates may seek investment banking or other business from the company or companies that are the subject of this material. EGFSL may have issued or may issue other reports (on technical or fundamental analysis basis) of the same subject company that are inconsistent with and reach different conclusion from the information, recommendations or information presented in this report or are contrary to those contained in this report. Users of this report may visit www.emkayglobal.com to view all Research Reports of EGFSL. The views and opinions expressed in this document may or may not match or may be contrary with the views, estimates, rating, and target price of the research published by any other analyst or by associate entities of EGFSL; our proprietary trading, investment businesses or other associate entities may make investment decisions that are inconsistent with the recommendations expressed herein. In reviewing these materials, you should be aware that any or all of the foregoing, among other things, may give rise to real or potential conflicts of interest including but not limited to those stated herein. Additionally, other important information regarding our relationships with the company or companies that are the subject of this material is provided herein. All material presented in this report, unless specifically indicated otherwise, is under copyright to Emkay. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of EGFSL. All trademarks, service marks and logos used in this report are trademarks or registered trademarks of EGFSL or its affiliates. The information contained herein is not intended for publication or distribution or circulation in any manner whatsoever and any unauthorized reading, dissemination, distribution or copying of this communication is prohibited unless otherwise expressly authorized. Please ensure that you have read "Risk Disclosure Document for Capital Market and Derivatives Segments" as prescribed by Securities and Exchange Board of India before investing in Indian Securities Market. In so far as this report includes current or historic information, it is believed to be reliable, although its accuracy and completeness cannot be guaranteed.
This report has not been reviewed or authorized by any regulatory authority. There is no planned schedule or frequency for updating research report relating to any issuer/subject company.
Please contact the primary analyst for valuation methodologies and assumptions associated with the covered companies or price targets.
Disclaimer for U.S. persons only: Research report is a product of Emkay Global Financial Services Ltd., under Marco Polo Securities $15 a 6$ chaperone service, which is the employer of the research analyst(s) who has prepared the research report. The research analyst(s) preparing the research report is/are resident outside the United States (U.S.) and are not associated persons of any U.S. regulated broker-dealer and therefore the analyst(s) is/are not subject to supervision by a U.S. broker-dealer, and is/are not required to satisfy the regulatory licensing requirements of Financial Institutions Regulatory Authority (FINRA) or required to otherwise comply with U.S. rules or regulations regarding, among other things, communications with a subject company, public appearances and trading securities held by a research analyst account.
This report is intended for distribution to "Major Institutional Investors" as defined by Rule $15 \mathrm{a}-6$ (b)(4) of the U.S. Securities and Exchange Act, 1934 (the Exchange Act) and interpretations thereof by U.S. Securities and Exchange Commission (SEC) in reliance on Rule 15a 6(a)(2). If the recipient of this report is not a Major Institutional Investor as specified above, then it should not act upon this report and return the same to the sender. Further, this report may not be copied, duplicated and/or transmitted onward to any U.S. person, which is not the Major Institutional Investor. In reliance on the exemption from registration provided by Rule 15a-6 of the Exchange Act and interpretations thereof by the SEC in order to conduct certain business with Major Institutional Investors. Emkay Global Financial Services Ltd. has entered into a chaperoning agreement with a U.S. registered broker-dealer, Marco Polo Securities Inc. ("Marco Polo"). Transactions in securities discussed in this research report should be effected through Marco Polo or another U.S. registered broker dealer.

## RESTRICTIONS ON DISTRIBUTION

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation. Except otherwise restricted by laws or regulations, this report is intended only for qualified, professional, institutional or sophisticated investors as defined in the laws and regulations of such jurisdictions. Specifically, this document does not constitute an offer to or solicitation to any U.S. person for the purchase or sale of any financial instrument or as an official confirmation of any transaction to any U.S. person. Unless otherwise stated, this message should not be construed as official confirmation of any transaction. No part of this document may be distributed in Canada or used by private customers in United Kingdom.

## ANALYST CERTIFICATION BY EMKAY GLOBAL FINANCIAL SERVICES LIMITED (EGFSL)

The research analyst(s) primarily responsible for the content of this research report, in part or in whole, certifies that the views about the companies and their securities expressed in this report accurately reflect his/her personal views. The analyst(s) also certifies that no part of his/her compensation was, is, or will be, directly or indirectly, related to specific recommendations or views expressed in the report. The research analyst (s) primarily responsible of the content of this research report, in part or in whole, certifies that he or his associated persons1 may have served as an officer, director or employee of the issuer or the new listing applicant (which includes in the case of a real estate investment trust, an officer of the management company of the real estate investment trust; and in the case of any other entity, an officer or its equivalent counterparty of the entity who is responsible for the management of the issuer or the new listing applicant).
