Technical Snapshot

SELL GOLD AUG @ 97100 SL 97500 TGT 96600-96200. MCX

Observations

Gold trading range for the day is 95675-98335.

Gold dropped after strong labor data hampered bets of a dovish Fed.

June's jobs report showed that nearly 150,000 jobs were added to the US economy, well above expectations of 110,000.

Markets also awaited updated on new trade deals ahead of July 9th's deadline for the reintroduction of Liberation Day tariffs.

Tariffs on Vietnam were lowered to 20% from 46%, but reports indicated that negotiations with other major trading partners faced roadblocks.

Technical Snapshot

SELL SILVER SEP @ 108800 SL 109800 TGT 107600-106800. MCX

Observations

Silver trading range for the day is 106545-109575.

Silver gains despite the dollar index climbed above 97.3 after a stronger-than-expected June jobs report.

The US economy added 147,000 jobs in June, up from 144,000 in May and well above market forecasts of 110,000.

The US trade gap widened to \$71.5 billion in May 2025 from a downwardly revised \$60.3 billion gap in April.

The unemployment rate unexpectedly dipped to 4.1%, defying expectations of a rise to 4.3%.

Gold dropped after strong labor data hampered bets of a dovish Fed. June's jobs report showed that nearly 150,000 jobs were added to the US economy, well above expectations of 110,000, to push back against calls that a softening labor market warranted a Fed rate cut this month. In the meantime, fiscal uncertainty eased amid optimism that the House representatives overcame some roadblocks and were set to approve President Trump's tax and spending bill, set to maintain the aggressive budget deficit from the document approved by the Senate.

India demand muted despite price correction; buying picks up in China, Singapore - Demand for physical gold in India remained subdued despite a correction in prices, as buyers held out for a bigger drop, while demand improved in China and Singapore. Indian dealers were offering a discount of up to \$18 an ounce over official domestic prices, down from last week's discount of up to \$27. Jewellers weren't buying much new gold from banks because retail buyers were trading in their old jewellery for new ones, which met a good part of the demand. Dealers in top gold consumer China charged premiums of \$12-\$14 an ounce over the global benchmark spot price, higher than last week's \$10 premium. In Hong Kong, gold was sold at par to a \$2.00 premium, while in Singapore, gold traded between at-par price and a \$2.20 premium. In Japan, bullion was sold flat to a \$0.5 premium.

Pace of US gold flows into Switzerland slows slightly in May, data shows - Gold imports into Switzerland from the United States continued in May, following the exclusion of precious metals from U.S. import tariffs, but import volumes dipped slightly from April, Swiss customs data showed. Between December and March, Switzerland, the world's leading bullion refining and transit hub, and Britain, home to the largest over-the-counter gold trading market, recorded significant gold outflows to the U.S. as traders moved to hedge against the potential impact of broad U.S. tariffs on bullion imports. Swiss customs data revealed that gold imports from the U.S. reached 58.9 tons in May, a sharp rise from 6.8 tons in the same month last year. In April, imports peaked at 63.0 tons, the highest monthly total since at least 2012. Swiss exports to the UK rose, suggesting that gold was also flowing back to London vaults from the U.S., routed through Swiss refineries. Switzerland's total gold exports fell by 13.7% month-on-month in May, with gold deliveries to the United Arab Emirates, Hong Kong and U.S. significantly dropping. Swiss gold exports to key Asian markets India and China rose by 17% and 56% respectively from April to May.

Share of gold in India's forex reserves doubles in four years, central bank report shows - The share of gold held by India's central bank in its foreign exchange reserves has doubled in the last four years as on March-end, a report by the Reserve Bank of India showed on Monday. In dollar value terms, the share of gold in the total foreign exchange reserves increased to about 11.70% by end-March, from 9.32% as at end-September 2024 and 5.87% as on end-March 2021, the central bank's half year forex reserves report said. As of end-March, the RBI held 879.59 metric tonnes of gold, compared to 854.73 metric tonnes at the end of September. The proportion of gold held domestically rose to 511.99 metric tonnes as of March 31, against 510.46 metric tonnes at September-end, the RBI said. "While 348.62 metric tonnes of gold were kept in safe custody with the Bank of England and the Bank for International Settlements (BIS), 18.98 metric tonnes were held in the form of gold deposits," the report showed.

Gold Demand Q1 2025: Investment Soars 170% Despite Weak Jewellery and Central Bank Buying - Global gold demand including over-the-counter (OTC) trading rose by 1% year-on-year to 1,206 metric tons in the first quarter of 2025 as investment jumped 170%, the World Gold Council said. Driving up investment demand were massive inflows into physically backed gold exchange-traded funds and 14% growth in demand for gold bars in the first quarter. That offset a 32% slump in demand for coins. However, bar and coin investment in China rose 12% to 124.2 tons, the highest level since the second quarter of 2013's record high, said the WGC. Amid high prices, global gold jewellery consumption, fell 21% to 380.3 tons, the lowest level since the 2020 pandemic. Central banks, another major source of gold demand, cut purchases by 21% to 243.7 tons in the first quarter, the WGC calculated, based on reported purchases and an estimate of unreported buying.
