Gold climbed bolstered by increased demand for safe-haven assets. Investors are closely watching developments in the Middle East as tensions flared following Hezbollah's announcement on Friday that it is entering a more intense phase in its conflict with Israel, while reports over the weekend indicated that Israeli strikes hit Beirut's southern suburbs and other regional targets. The uncertainty surrounding the upcoming US presidential elections is also further increasing the appeal of safe-haven assets.

Record prices dull India demand ahead of key festival - Physical gold dealers in India were forced to offer discounts, as record high prices dampened demand ahead of a key festival, while discounts in top consumer China narrowed. Indian dealers offered a discount of up to \$8 an ounce over official domestic prices, versus last week's \$3 premium. Chinese dealers narrowed discounts to \$3-\$14 below international spot prices, from \$15-\$31 discounts quoted last week. In Hong Kong, gold was sold between \$2 discount and \$1.20 premium. Retail gold demand in China has taken a hit this year amid sky-high prices and economic slowdown. In Singapore, gold was sold between discount \$0.80 to \$2.20 premium.

Swiss gold exports fall on lower supplies to India - Swiss gold exports fell in September to the lowest level since June owing to reduced shipments to India, customs data from the world's biggest bullion refining and transit hub showed. Some deliveries to China, the world's largest gold consumer, resumed in September after zero supplies in August, but exports to India, the world's second-largest gold consumer and a major importer, slumped to the lowest level since January, 2023. Deliveries to India fell after massive supplies in August-July when the country reduced the state gold import tax to the lowest in 11 years, temporarily boosting demand.

China's gold reserves unchanged for fifth straight month in September - China's central bank held back on buying gold for its reserves for a fifth straight month in September, official data showed, mainly due to a surge in prices for the yellow metal. China's gold holdings stood at 72.8 million troy ounces at the end of last month. The value of the gold reserves, however, rose to \$191.47 billion from \$182.98 billion at the end of August. Global central banks, which actively bought gold in 2022-2023, are on track to slow purchases in 2024 from 2023, according to the World Gold Council, but to keep them above the pre-2022 level. This is partly due to the pause in purchases by the People's Bank of China (PBOC), which until May had bought gold for 18 consecutive months.

China's August net gold imports via HK lowest in over 2 years - China's monthly net gold imports via Hong Kong dropped 76% to their lowest level in more than two years in August, data showed, as a record price rally curbed appetite in the world's top bullion consumer. China imported a net 6.245 metric tons in August, down from 25.659 tons in July, Hong Kong Census and Statistics Department data showed. Imports were at their lowest level since April 2022. Total gold imports via Hong Kong were down 48% at 16.377 metric tons last month.
