Nifty opened on a flat note and witnessed selling pressure in initial hours. However it has remained lackluster within 25050-24850 throughout the session. Nifty closed at 25045 with a gain of 58 points. On the daily chart the index has formed a Bearish candle which resembles as Hanging man candlestick formation which is a bearish reversal formation. For such formations confirmation is necessary, so if the index breaks below previous day's low it would witness a change of trend to the downside. The chart pattern suggests that if Nifty crosses and sustains above 25100 level it would witness buying which would lead the index towards 25200 - 25300 levels. Important Supports for the day is around 24800 However if index sustains below 24800 then it may witness profit booking which would take the index towards 24700-24500 levels.
