Kick-starting progress

Breakthrough quarter on growth and margins

- LTIMindtree (LTIM) reported revenue of USD1.1b in 2QFY26, up 2.4% QoQ CC, above our estimate of 2.0% QoQ CC growth. EBIT margin at 15.9% was above our estimate of 14.9%. PAT stood at INR13.8b, up 10.1% QoQ/10.4% YoY and in line with our estimate of INR13b.
- In INR terms, revenue/EBIT/PAT grew 8.9%/8.0%/10.4% YoY in 1HFY26. In 2HFY26, we expect revenue/EBIT/PAT to grow 11.5%/28.4%/29.4% YoY. With improving revenue visibility and earnings growth potential of 13-15% over the medium term, we upgrade our estimates by 5.1%/3.8% for FY26/FY27. We value LTIM at 31x Jun'27E EPS with a TP of INR6,650, implying an 18% upside potential.

Our view: Growth momentum finds its footing

- **Revenue visibility strong for the next three quarters:** Management guided for sustained revenue momentum over the next two quarters. A 2.5% CQGR in 2H is expected to bring LTIM's USD growth exit rate closer to 9%. If the deal win momentum continues, we expect this pace to sustain into FY27E as well; we expect a double-digit growth rate in FY27.
- **Margin improvement ahead of expectations:** EBIT margin stood at 15.9%, up 160 bps QoQ, ahead of management expectations. The improvement was driven by the 'Fit4Future' program (contributing ~80 bps) and currency tailwinds (another 80 bps). Management also guided for a further margin expansion in 3Q. We expect margins to expand by 100/30bps in FY26/FY27.
- **Strong deal win performance:** Since Mr. Venu has taken over, LTIM's large deal wins have certainly received a shot in the arm, and we saw further evidence of that this quarter. Deal TCV at USD1.59b was up 22% YoY. The new management is doing a commendable job and improving win rates in an uncertain macro.
- In summary, revenue growth has regained momentum, and margin expansion now seems sustainable. This could lead to earnings growth of 13-15% over the medium term, leading to a potential re-rating.

Valuation and changes to our estimates

- We reiterate our BUY rating on LTIM, supported by its capabilities in data engineering and ERP modernization. The company's broad-based vertical momentum and sustained deal pipeline support our confidence in ~6% CC revenue growth for FY26E. Margin performance has been ahead of expectations, aided by the 'Fit4Future' program, and we expect further expansion over 2H. With improving revenue visibility and earnings growth potential of 13-15% over the medium term, we upgrade our estimates by 5.1%/3.8% for FY26/FY27. We value LTIM at **31x Jun'27E EPS**, arriving at a **TP of INR6,650**, implying **~18% upside**.

Key highlights from the management commentary

Demand and industry outlook

- LTIM remains confident of sustaining growth momentum through 2H, aided by its large deal pipeline and ongoing transformation programs.
- The management highlighted that legacy modernization is witnessing renewed client interest. Market priorities have shifted — clients now seek modernization of data, technology, and infrastructure through vendor consolidation-led large deals.
- The company expects revenue growth to accelerate in the coming quarters and aims to achieve high single-digit to low double-digit growth by FY26-end (in USD terms).
- Management remains confident that the momentum will continue, with growth expected to be slightly higher than 2Q.
- The company emphasized that deal execution and delivery efficiencies remain key drivers of growth.
- Total order inflow stood at USD1.59b, up 22% YoY, marking the fourth consecutive quarter of TCV exceeding USD1.5b. The BFSI vertical was a key contributor to deal momentum.
- Key wins included a strategic engagement with a large media company, which will take longer to ramp up due to multi-vendor transitions (after couple of quarters).
- Order booking patterns are influenced by three factors: 1) transition periods determining when deals move into steady-state execution, 2) renewal deals that are being recalibrated and clubbed with vendor consolidation programs (e.g., a large media deal), and 3) renewal contracts being reset to new pricing benchmarks in a productivity-focused market.
- LTIM also secured a significant government contract with the Department of Direct Taxes to modernize the “PAN 2.0” infrastructure, which has already begun ramping up and will scale further in 3QFY26.
- Most new deals continue to leverage vendor consolidation opportunities, though net-new deal activity also remains healthy.
- Large accounts are undergoing AI-led recalibration, where productivity commitments are built into contracts. Management emphasized that productivity is now the “new normal” until the industry transitions to the next phase of growth.
- **BFSI:** The vertical entered FY26 on the back of strong FY25 growth but faced some recalibration due to vendor transitions. Growth is expected to improve over the next couple of quarters, with management optimistic about 2H recovery.
- **Technology, Media & Communications:** Post-productivity recalibrations are largely behind, and the company expects growth to resume as renewals normalize. The pipeline remains healthy.
- **Consumer Business:** Revenue grew 9.1% QoQ, led by strong demand across key accounts.
- Around 80,000 employees have completed the GenAI foundation program, underscoring the company’s focus on AI-led capability building.

Margin performance

- EBIT margin stood at 15.9%, up 160 bps QoQ, ahead of management expectations. The improvement was driven by the “Fit4Future” program (contributing ~80 bps) and currency tailwinds (another 80 bps).
- 1Q typically sees higher seasonal costs, the absence of which supported SG&A rationalization in 2Q.
- Wage hikes are being staggered across two quarters (January and April 2026). The company emphasized cross-skilling and upskilling initiatives instead of a single annual hike cycle.
- The Fit4Future program—focused on productivity through AI adoption, pyramid correction (via fresher hiring), optimizing span of control, and lowering overheads—continues to yield results.
- Management reiterated confidence in further margin expansion in the coming quarters despite seasonal headwinds.
- LTIM aims to maintain an OCF to PAT ratio near 90%. Free cash flow generation will remain impacted in the near term due to investments in new delivery hubs and internal IT modernization.
- Utilization remained flat during the quarter (at highs of 88%), but management aims to take it to 85–86% over the next few quarters.
- The fresher hiring program remains intact, and subcontractors may be used selectively for initial deal ramp-ups.
