Nifty finding resistance near the 26000 zone has witnessed a rangebound movement with bias maintained strong, however, can anticipate for some profit booking in the comning sessions. The market breadth was slightly on the positive side with the advance decline indicating a 6:5 ratio at close.

Market Forecast

Nifty daily range 25600 - 26100

Nifty once again witnessed a rangebound session with some fluctuations visible resisting near the 26000 zone and closed almost on a flat note near the 25900 level with consolidation happening near the 25800-zone maintaining the bias positive. As mentioned earlier, the technical parameters are positioned at their highly overbought zone and the chances of some profit booking cannot be ruled out with some cooling off process required, having the near-term support at 25200 level while the major support is positioned near the 24800 level which needs to be sustained.

BankNifty has been hovering between the 64000 and 63400 zone since the last two sessions witnessing consolidation and with bias maintained strong would have the near-term support near the 61700 zone which needs to be sustained. On the upside, the 65000 level would be the resistance zone, which the index had to breach above to trigger for fresh upward move in the coming days. As said earlier, currently with the technical parameters being overheated, one can anticipate for some profit booking in the coming sessions which would be a healthy sign as of now.

The support for the day is seen at 25600 level, while the resistance is seen at 26100 levels. BankNifty would have the daily range of 62600-64600 levels.
