US PCE prices unexpectedly declined by 0.1% mom in November, contrary to market forecasts of a flat reading, while core prices increased by 0.1% compared to forecasts of 0.2% advance. Asia Gold: High prices drain demand in India, China sees rising premiums - Physical gold demand in India fell sharply due to high domestic prices, forcing dealers to quote steeper discounts, with other Asian hubs seeing muted bids, barring China, which witnessed rising premiums. Dealers were offering a discount of up to \$16 an ounce over official domestic prices, versus last week's \$14. In China, premiums climbed to \$34-\$41 per ounce over global spot prices, up from \$20-\$40 premiums charged in the previous week. In Singapore, premiums of \$1-\$2.25 per ounce were quoted for the bullion. Dealers in Hong Kong charged \$0.5-\$2 per ounce premiums, narrowing the range from those quoted last week. In Japan, dealers sold gold at par to \$1 premiums.

China's Jan Sept gold consumption climbs over 7% on rising investment interest - China's gold consumption in the first three quarters of 2023 climbed 7.32% from a year earlier on increasing demand amid economic recovery, the China Gold Association said. Consumption of the precious metal in the world's largest consumer totaled 835.07 metric tons in the January-September period, with over 66%, or 552.04 tons, in gold jewellery, a rise of 5.72% year-on-year. The rising pace of consumption of gold jewellery slowed down in the third quarter as buyers preferred to take a watchful stance amid lingering high gold prices, according to the association. The People's Bank of China continued to buy gold in September for the eleventh month in a row, increasing its reserves to 2191.55 tons by the end of the third quarter.

China's net gold imports via Hong Kong drop in October - China's net gold imports via Hong Kong fell for a second consecutive month in October, data showed, as a patchy economic recovery weighed on demand in the key bullion market. Net imports into China, traditionally the biggest gold consumer in the world, fell 23% to 26.793 metric tons in October, compared with 34.757 tons in September, data from the Hong Kong Census and Statistics Department showed. China's consumer prices swung lower in October, as key gauges of domestic demand pointed to weakness not seen since the pandemic, while factory-gate deflation deepened, casting doubts over the chances of a broad-based recovery.
