Gold gains as Federal Reserve Chair Jerome Powell signals that the central bank is ready to start easing interest rates. In his much-anticipated speech at the Jackson Hole Central Bank Symposium, Powell said that the upside risk to inflation has diminished and risks to the labor market have grown. Although rising inflation risks have been subdued, Powell noted that the central bank will continue to monitor economic conditions.

Lofty prices smother purchases in top hubs; China issues import quotas - A rally in gold prices stifled demand in major Asian hubs this week, with dealers offering deeper discounts to charm buyers and bullion flows into top consumer China expected to be facilitated by the issuance of new import quotas. Dealers in China were offering discounts of between \$18 to \$3 per ounce on the international spot price, compared to a \$8.5 discount to a \$5 premium last week. Indian dealers offered a discount of up to \$6 an ounce over official domestic prices this week, up from last week's \$3 discount. In Singapore, bullion was sold between a discount of \$0.30 to a \$2.25 premium, while in Hong Kong, it was sold between at par to a \$2.00 premium. Dealers in Japan sold gold at a \$3.0 discount to par levels. Combined imports to China and India in July were down 58% year-on-year, though the year-to-date volumes are still up by 5% given the strong start to the year.

China's gold demand expected to rebound as economic jitters spur buying - Gold demand in China is expected to improve in coming months as consumers adjust to higher prices, industry officials said, with economic uncertainty and concerns about currency weakness driving investment flows. A revival of demand in the world's top consumer of the precious metal could further support the rally in global gold prices, which hit a record high last week. In July, they stayed on the sidelines, but recently, investment demand has picked up again. Discounts are narrowing as demand improves. The rise has been fuelled by a number of factors, including the prospect of interest rate cuts in the United States, global geopolitical tension and increased buying by investors. However, new quotas issued to several Chinese banks in August are intended to help regulate the flow of bullion into the country.

Swiss July gold exports hit highest since April with higher supplies to India, UK - Swiss July gold exports rose to the highest since April as higher supplies to India and Britain offset reduced shipments to China, customs data from the world's biggest bullion refining and transit hub showed. In India, the world's second-largest gold consumer and a major importer, demand received a boost from July's reduction of the state gold import tax to the lowest in 11 years. With spot gold prices up 22% so far this year, Swiss gold exports to top consumer China and Hong Kong fell month-on-month in July, while deliveries to Turkey remained weak, the data showed.

China issues new gold import quotas after pause - Several Chinese banks have been given new gold import quotas from the central bank, anticipating revived demand despite record high prices. The new quotas, aimed at helping the People's Bank of China (PBOC) control how much bullion enters the world's leading consumer of the precious metal, were granted in August after a two-month pause largely due to slower physical demand in the wake of a bullish market. China's central bank held back on buying gold for its reserves for a third straight month in July and gold holdings stood at 72.8 million fine troy ounces at the end of last month. The PBOC was the world's largest single buyer of gold in 2023, with net purchases of 7.23 million ounces, according to the World Gold Council (WGC).
