| Urban Company's Q2FY26 consolidated NTV for Q2FY27 stood at INR1.3b, rising 42% YoY, above our estimate of 50% YoY                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                  |                                          |
| Instahelp consumer services NTV stood at INR1.1b, growing 28% YoY vs. our estimate of 22% YoY. Netow Business NTV stood at INR1.35bn, growing 23% YoY vs. our estimate of 20% YoY. Instahelp NTV stood at INR1.05bn vs. our estimate of INR1.05bn                                                                                                                                                                                                                                                                                                                                                                               |                  |                                          |
| For India consumer services, adjusted EBITDA as % of NTV margin was up 100bps QoQ at 8.0%, vs our estimate of 5.0%. For Instahelp, adjusted EBITDA margin stood at INR1.32b in Q2FY27 (vs our estimates of INR1.25b loss). Adj PAT loss came in at INR1.05bn (vs loss of INR1.05bn)                                                                                                                                                                                                                                                                                                                                             |                  |                                          |
| For Q2FY27, its revenue grew 40% YoY, while EBITDA loss decreased to INR1.05bn in Q2FY27 (vs INR1.05bn in Q2FY26). Adj PAT loss decreased to INR1.05bn (vs 1.05bn in Q2FY26). Instahelp Neutral with a revised TP of INR140.                                                                                                                                                                                                                                                                                                                                                                                                    |                  |                                          |
| Our view: Instahelp's TAM is encouraging, but the path to profitability remains uncertain                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                  |                                          |
| Core business on strong footing: growth and margins improving together                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                  |                                          |
| Instahelp Consumer Services NTV growth accelerated further to ~20% YoY in Q2FY27, meeting the 18% conservative quarter of margin growth. Growth was broad-based across beauty, repairs, cleaning and handyman services, supported by better supply density, faster fulfillment, and improving customer retention. Adjusted EBITDA margin also expanded to ~8.0% of NTV (vs. ~5.0% last year), improving operating leverage despite weight for marketing spend. We believe the core marketplace is now operating from a much stronger base than a year ago and built in FY27/28 growth of 20-25% for India Consumer Services NTV |                  |                                          |
| Instahelp TAM now better defined, but profitability still hinges on pricing                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                  |                                          |
| Instahelp's TAM, for the first time, outlined a bottom-up Instahelp TAM of ~INR1.05b (prior to Q2FY26) and 2) across the top 15 cities, implying a meaningful long-term opportunity if the category matures                                                                                                                                                                                                                                                                                                                                                                                                                     |                  |                                          |
| However, we believe the key monetization remains the industry's ability to gradually normalize pricing. Current AOV (~INR1.3b) is well below the ~INR1.5b level required for category breakeven, suggesting a rate alone may not be sufficient to drive profitability. While loss per order improved to ~INR1.05 (vs. ~INR1.05 in Q2FY26), the company continues to prioritize market leadership over near-term profits and expects leadership to reach breakeven only by FY28. We continue to factor revised Instahelp breakeven into our estimates                                                                            |                  |                                          |
| Investors are advised to refer through important disclosures made at the last page of the Research Report.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                  |                                          |

## Instant, multi-category home services: Sizing the opportunity

India's high-frequency home operating services market represents a large and significantly under-digitized consumer opportunity. This note examines five key themes shaping the category's growth: 1) expansion of the addressable market beyond traditional house help services, 2) structural advantages of the business model compared with other consumer internet businesses, 3) city-level execution and micro-market density, 4) the path to profitability and the competitive landscape, and 5) the long-term opportunity to build a multi-category, high-frequency home services platform. **To better understand the space, we met with Snabbit CEO Aayush Agarwal; key insights from this discussion are incorporated in this note.**

The broader thesis suggests that high-frequency home operating services remain one of India's largest yet least-digitized consumer categories, with digital penetration below 2% among urban households in Metro and Tier-1 cities. Over the next five years, Snabbit expects urbanization, rising per-capita GDP, and higher discretionary incomes to drive category expansion. **Across house help, home cooks, salon-at-home, and other household services, Snabbit believes it can build an ARR of approximately USD6b over this period.** In the immediate term, however, the company remains focused on improving unit economics and deepening density within existing cities rather than pursuing aggressive geographic expansion.

Our estimates peg the total high frequency (house help) serviceable addressable market at ~USD3.7b (refer to Exhibit 1). This estimate captures two primary use cases: a) ad-hoc support when a household's regular help is unavailable, and b) households transitioning entirely from conventional house-help arrangements to an on-demand model.

## The opportunity is larger if adjacencies play out; house help replacement and displacement opportunity could be USD3.7b

- The company believes house help, cooks, salon-at-home, elderly care, and other adjacencies unlock a much larger digital services opportunity (USD9-10b).
- It could be slightly early to estimate the adjacent demand vectors, but our estimates suggest house help demand alone could be USD3.7b. As shown in Exhibit 1, we present base, bull, and bear case scenarios for house-help adoption in India, taking into account both the potential household replacement demand as well as ad-hoc leave replacement demand that is currently playing out in key micro markets.
- Snabbit is being built across multiple high-frequency home operating services, with house help currently the largest category. Over time, Snabbit intends to expand into **home cooks, salon-at-home, drivers, childcare, elderly care, and other household services**, materially increasing customer frequency.
- Salon-at-home is being approached differently by **unbundling low-AOV, high-frequency beauty services**, particularly functional and repetitive needs such as

threading and waxing, and making them available instantly. The uptake of such adjacent services should drive higher frequency for both the industry as well as Snabbit.

- The current focus remains on the top metro cities where customer density supports faster marketplace development. Over the longer term, the company estimates that the **top 50 cities could support 1,500+ micro-markets**, with a mature network eventually scaling to **~1,500 daily jobs per micro-market** from house-help services alone. This potential is already visible across several of Snabbit's mature micro-markets, which have reached these volumes within 12–18 months and continue to grow. We believe Tier-2 adoption could follow a similar trajectory to food delivery, ride-hailing, and quick commerce, as consumer trust in on-demand home services improves.

### Competition intensifying between players

- **Snabbit and Urban Company are neck and neck:** Snabbit has crossed 115k daily jobs, with ARR growing from USD9m in Dec'25 to a projected triple-digit figure by Mar'27. Industry data also suggests Snabbit processed ~1.51m monthly orders during June, at par with Urban Company's InstaHelp (~1.50m), with these numbers rising to ~1.85m monthly orders for Snabbit and ~1.9m for Urban Company in July.
- **Execution continues to be driven by micro-market density rather than rapid city expansion:** Mumbai remains the largest market, followed by NCR, while Bengaluru is the third-largest geography for Snabbit.
- The strategy continues to prioritize increasing density within existing clusters instead of entering several new cities simultaneously. We believe this approach should improve supply availability, customer experience, and marketplace utilization before broader geographic expansion.
- The company is live across **~200 micro-markets** in the top five cities, nearly half of which were launched over the last four months. We believe marketplace density is likely to become an increasingly important differentiator in the category, as higher local liquidity can improve service availability and customer experience while allowing the platform to build deeper supply pools within individual markets.

### Unit economics: Currently burning INR250/order; path to positive CM over the medium term

- Unlike e-commerce and quick commerce, the business does not require inventory, warehousing, or asset-heavy infrastructure, resulting in a structurally leaner cost base. The model also avoids significant capital and operating costs associated with owned vehicles, fuel, and fleet maintenance typically involved in mobility businesses.
- In the last quarter, Snabbit recorded an EBITDA loss of INR250/order (vs INR350/order for Urban Company). However, it is too early to draw definitive comparisons, as cash burn and steady-state economics could evolve materially as the category matures (**refer to Exhibit 2**).
- **Key drivers of improving unit economics: Higher utilization levels, higher AOV, and winning more micro-markets.**

- Over the long term, Mr. Agarwal believes that the business can sustain **EBITDA margins of 8-10% (similar to the home services market)**, driven primarily by higher net order value and higher expert utilization through marketplace efficiency, rather than relying solely on fixed-cost operating leverage.
- We believe the home services category (including instant help) has structurally higher margins vs other consumer internet businesses such as food delivery and quick commerce. That said, irrational competition can keep margins suppressed for longer.

The following Disclosures are being made in compliance with the SEBI Research Analyst Regulations 2014 (herein after referred to as the Regulations).

Motilal Oswal Financial Services Ltd. (MOFSL) is a SEBI Registered Research Analyst having registration no. INH000000412. MOFSL, the Research Entity (RE) as defined in the Regulations, is engaged in the business of providing Stock broking services, Depository participant services & distribution of various financial products. MOFSL is a listed public company, the details in respect of which are available on [www.motilaloswal.com](http://www.motilaloswal.com). MOFSL (erstwhile Motilal Oswal Securities Limited - MOSL) is registered with the Securities & Exchange Board of India (SEBI) and is a registered Trading Member with National Stock Exchange of India Ltd. (NSE) and Bombay Stock Exchange Limited (BSE), Multi Commodity Exchange of India Limited (MCX) and National Commodity & Derivatives Exchange Limited (NCDEX) for its stock broking activities & is Depository participant with Central Depository Services Limited (CDSL) National Securities Depository Limited (NSDL), NERL, COMRIS and CCRL and is member of Association of Mutual Funds of India (AMFI) for distribution of financial products and Insurance Regulatory & Development Authority of India (IRDA) as Corporate Agent for insurance products. Details of associate entities of Motilal Oswal Financial Services Limited are available on the website at <http://online.reports.motilaloswal.com/Dormant/documents/List%20of%20Associate%20companies.pdf>.

MOFSL and its associate company(ies), their directors and Research Analyst and their relatives may; (a) from time to time, have a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. (b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report.

MOFSL and / or its affiliates do and seek to do business including investment banking with companies covered in its research reports. As a result, the recipients of this report should be aware that MOFSL may have a potential conflict of interest that may affect the objectivity of this report. Compensation of Research Analysts is not based on any specific merchant banking, investment banking or brokerage services transactions. Details of pending Enquiry Proceedings of Motilal Oswal Financial Services Limited are available on the website at <https://galaxy.motilaloswal.com/ResearchAnalyst/PublishViewLitigation.aspx>.

A graph of daily closing prices of securities is available at [www.nseindia.com](http://www.nseindia.com), [www.bseindia.com](http://www.bseindia.com). Research Analyst views on Subject Company may vary based on Fundamental research and Technical Research. Proprietary trading desk of MOFSL or its associates maintains arm's length distance with Research Team as all the activities are segregated from MOFSL research activity and therefore it can have an independent view with regards to Subject Company for which Research Team have expressed their views.

#### Regional Disclosures (outside India)

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL & its group companies to registration or licensing requirements within such jurisdictions.

#### For Hong Kong:

This report is distributed in Hong Kong by Motilal Oswal capital Markets (Hong Kong) Private Limited, a licensed corporation (CE AYY-301) licensed and regulated by the Hong Kong Securities and Futures Commission (SFC) pursuant to the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) "SFO". As per SEBI (Research Analyst Regulations) 2014 Motilal Oswal Securities (SEBI Reg. No. INH000000412) has an agreement with Motilal Oswal capital Markets (Hong Kong) Private Limited for distribution of research report in Hong Kong. This report is intended for distribution only to "Professional Investors" as defined in Part I of Schedule 1 to SFO. Any investment or investment activity to which this document relates is only available to professional investor and will be engaged only with professional investors." Nothing here is an offer or solicitation of these securities, products and services in any jurisdiction where their offer or sale is not qualified or exempt from registration. The Indian Analyst(s) who compile this report is/are not located in Hong Kong & are not conducting Research Analysis in Hong Kong.

#### For U.S.

Motilal Oswal Financial Services Limited (MOFSL) is not a registered broker - dealer under the U.S. Securities Exchange Act of 1934, as amended (the "1934 act") and under applicable state laws in the United States. In addition MOFSL is not a registered investment adviser under the U.S. Investment Advisers Act of 1940, as amended (the "Advisers Act" and together with the 1934 Act, the "Acts"), and under applicable state laws in the United States. Accordingly, in the absence of specific exemption under the Acts, any brokerage and investment services provided by MOFSL, including the products and services described herein are not available to or intended for U.S. persons. This report is intended for distribution only to "Major Institutional Investors" as defined by Rule 15a-6(b)(4) of the Exchange Act and interpretations thereof by SEC (henceforth referred to as "major institutional investors"). This document must not be acted on or relied on by persons who are not major institutional investors. Any investment or investment activity to which this document relates is only available to major institutional investors and will be engaged in only with major institutional investors. In reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act") and interpretations thereof by the U.S. Securities and Exchange Commission ("SEC") in order to conduct business with Institutional Investors based in the U.S., MOFSL has entered into a chaperoning agreement with a U.S. registered broker-dealer, Motilal Oswal Securities International Private Limited. ("MOSIPL"). Any business interaction pursuant to this report will have to be executed within the provisions of this chaperoning agreement.

The Research Analysts contributing to the report may not be registered /qualified as research analyst with FINRA. Such research analyst may not be associated persons of the U.S. registered broker-dealer, MOSIPL, and therefore, may not be subject to NASD rule 2711 and NYSE Rule 472 restrictions on communication with a subject company, public appearances and trading securities held by a research analyst account.

#### For Singapore

In Singapore, this report is being distributed by Motilal Oswal Capital Markets (Singapore) Pte. Ltd. ("MOCMSPL") (UEN 201129401Z), which is a holder of a capital markets services license and an exempt financial adviser in Singapore. This report is distributed solely to persons who (a) qualify as "institutional investors" as defined in section 4A(1)(c) of the Securities and Futures Act of Singapore ("SFA") or (b) are considered "accredited investors" as defined in section 2(1) of the Financial Advisers Regulations of Singapore read with section 4A(1)(a) of the SFA. Accordingly, if a recipient is neither an "institutional investor" nor an "accredited investor", they must immediately discontinue any use of this Report and inform MOCMSPL.

In respect of any matter arising from or in connection with the research you could contact the following representatives of MOCMSPL. In case of grievances for any of the services rendered by MOCMSPL write to [grievances@motilaloswal.com](mailto:grievances@motilaloswal.com).

#### Analyst Certification

The views expressed in this research report accurately reflect the personal views of the analyst(s) about the subject securities or issues, and no part of the compensation of the research analyst(s) was, is, or will be directly or indirectly related to the specific recommendations and views expressed by research analyst(s) in this report.

#### Terms & Conditions:

This report has been prepared by MOFSL and is meant for sole use by the recipient and not for circulation. The report and information contained herein is strictly confidential and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent of MOFSL. The report is based on the facts, figures and information that are considered true, correct, reliable and accurate. The intent of this report is not recommendatory in nature. The information is obtained from publicly available media or other sources believed to be reliable. Such information has not been independently verified and no guaranty, representation of warranty, express or implied, is made as to its accuracy, completeness or correctness. All such information and opinions are subject to change without notice. The report is prepared solely for informational purpose and does not constitute an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments for the clients. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. MOFSL will not treat recipients as customers by virtue of their receiving this report.

#### Disclaimer:

The report and information contained herein is strictly confidential and meant solely for the selected recipient and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent. This report and information herein is solely for informational purpose and may not be used or considered as an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments. Nothing in this report constitutes investment, legal, accounting and tax advice or a representation that any investment or strategy is suitable or appropriate to your specific circumstances. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. This may not be taken in substitution for the exercise of independent judgment by any recipient. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this document (including the merits and risks involved), and should consult its own advisors to determine the merits and risks of such an investment. The investment discussed or views expressed may not be suitable for all investors. Certain transactions -including those involving futures, options, another derivative products as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. No representation or warranty, express or implied, is made as to the accuracy, completeness or fairness of the information and opinions contained in this document. The Disclosures of Interest Statement incorporated in this document is provided solely to enhance the transparency and should not be treated as endorsement of the views expressed in the report. This information is subject to change without any prior notice. The Company reserves the right to make modifications and alternations to this statement as may be required from time to time without any prior approval. MOFSL, its associates, their directors and the employees may from time to time, effect or have effected an own account transaction in, or deal as principal or agent in or for the securities mentioned in this document. They may perform or seek to perform investment banking or other services for, or solicit investment banking or other business from, any company referred to in this report. Each of these entities functions as a separate, distinct and independent of each other. The recipient should take this into account before interpreting the document. This report has been prepared on the basis of information that is already available in publicly accessible media or developed through analysis of MOFSL. The views expressed are those of the analyst, and the Company may or may not subscribe to all the views expressed therein. This document is being supplied to you solely for your information and may not be reproduced, redistributed or passed on, directly or indirectly, to any other person or published, copied, in whole or in part, for any purpose. This report is not directed or intended for distribution to, or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL to any registration or licensing requirement within such jurisdiction. The securities described herein may or may not be eligible for sale in all jurisdictions or to certain category of investors. Persons in whose possession this document may come are required to inform themselves of and to observe such restriction. Neither the Firm, nor its directors, employees, agents or representatives shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost revenue or lost profits that may arise from or in connection with the use of the information. The person accessing this information specifically agrees to exempt MOFSL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold MOFSL or any of its affiliates or employees responsible for any such misuse and further agrees to hold MOFSL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays.
