Gold prices higher on more safe-haven demand amid the Israel-Hamas war that could well escalate in the near term. Notions of continued pause in Federal Reserve interest rate increases are also a bullish element for the metals markets. On the other hand, fresh PPI figures showed a higher-than-expected rise in the US producer prices, indicating present inflationary risks in the energy sector. The attention will now shift to the minutes of the central bank's meeting later in the day, as well as key US inflation data on Thursday.

India premiums spike as jewellers stock up for festive season - Physical gold demand improved in some Asian hubs as a dip in prices attracted buyers, with premiums in India hitting a 17-month high as jewellers stocked up ahead of the festival season. The higher demand allowed dealers in India to charge premiums of up to \$5 an ounce over official domestic prices, up from last week's \$4 premiums. Demand in India, usually strengthens towards the end of the year, during the traditional wedding season and major festivals including Diwali and Dusherra, when bullion buying is considered auspicious. Gold premiums in China had eased last week after hitting record highs in September, attributed to a lack of quotas to import gold into the top consumer.

China's gold imports via Hong Kong rebounded in August from the previous month, data showed on Tuesday, with the issuance of fresh quotas to local banks likely to boost shipments into the world's top gold consumer. Net imports stood at 39.023 metric tons in August, up 51.4% from the previous month, Hong Kong Census and Statistics Department data showed. That was still below the 68.227 tons reported a year earlier. Total gold imports via Hong Kong were up 49.6% on a monthly basis at 45.237 tons, but lower than 71.855 tons in August 2022. Official data showed that the People's Bank of China extended its streak of central bank gold purchases to a tenth straight month at end-August.

Swiss gold exports up in August due to higher shipments to India - Swiss gold exports rose by 7.3% in August from July as higher deliveries to India and China offset lower supplies to Turkey, customs data showed. Switzerland is the world's biggest bullion refining and transit hub, while China and India are the largest consumer markets with local demand sensitive to high prices and time of the season. Supplies to India, where jewellers usually make purchases for the October-November festival season, jumped by almost threefold to their highest since May, while shipments to China rose 1%, the data showed. China's physical gold premiums soared to a new high last week, amid strong demand to shore up a depreciating yuan and a lack of fresh import quotas.
