Havells India

B2C demand remains muted; higher ad-spends impact margins

Havells India's (HAVL) sales grew modestly at 7% YoY to Rs44bn, 5%/3% below our/ consensus estimate, amid subdued consumer demand. Cables grew 11% YoY to Rs15.7bn aided by infra-led B2B demand while Lloyd grew 7% YoY to Rs6.5bn. Switchgears/ECD/ Lighting segment sales grew in the range of only 1-3% YoY due to muted consumer demand. Gross margin rose 30bps YoY to 33.3%, but higher ad-spends (+90bps YoY forming 4% of sales vs. usual run-rate of 2-3%) led to 50bps YoY fall in EBITDA margin to 9.8%, below our/ consensus estimate of 10.2%/10.6%. PAT was flat YoY at Rs2.9bn, 12% below our/ consensus estimates of Rs3.3bn each due to both top-line and margin miss. B2B demand remains robust with uptrend in govt. capex. B2C demand is healthy for premium products in urban areas, while non-urban areas will pick up once inflationary impact moderates, which would benefit mass/economy range products. With focus on cost levers, FMEG margin can improve despite high competition. Factoring in Q3 results, we cut FY24E EPS estimate by 7% while FY25E/26E gets trimmed by 4%/2%. Retain REDUCE rating with revised target of Rs1,160 (Rs1,195 earlier) based on unchanged P/E of 42x H1FY26E EPS.

Electricals – B2C demand remains tepid; B2B growth aided by infra capex

Cables sales (Rs15.7bn, +11% YoY) was led by infra-led demand however unfavorable product mix caused EBIT margin to fall 110bps YoY to 10.4%, lowest in past 5 quarters. Cables-wires sales mix is 65-35 with wires having better margins. Rs3bn greenfield plant of underground cables will expand capacity by 25%. In switchgears (Rs5.2bn sales, +1% YoY), healthy growth from projects and retail was offset by lower sales from telecom OEMs and exports. EBIT margin fell 60bps YoY to 24.1%. Softer ECD sales (Rs9.6bn, +3% YoY) was due to subdued B2C demand and de-growth in fans on a high base (pre-BEE channel filling in Q3FY23). Fans growth is likely to be healthy in upcoming summer amidst lower channel inventory and normalcy in pricing with trade carrying only BEE rated fans. Small domestic appliances benefited from festive demand. EBIT margin fell 190bps YoY at 11.2%. In lighting (Rs4.3bn sales, +2% YoY), healthy growth in professional lighting was offset by LED price erosion in consumer lighting. EBIT margin rose 150bps YoY to 14.2% and has sustained 14-14.5% range in past 3 quarters.

Lloyd – Decent growth; EBIT loss continues as core priority is brand building

Lloyd sales grew 7% YoY to Rs6.5bn while EBIT losses continued at Rs652mn. RAC channel filling is lower YoY as trade is cautious. HAVL expects good summer season due to pent-up demand as last year's summer was truncated due to unseasonal rains. Lloyd's capacity utilization is at 50-60% across both plants. Lloyd believes that capacity addition by RAC brands wouldn't trigger price war in the industry as popular brands have vision for long term growth. In the Middle East market, Lloyd would position itself as a mass premium brand and will target NRI population. Lloyd's market share and margins are similar across offline and online channels. Channel finance accounted for 30-35% of total sales.

Other key takeaways: (1) OCF in 9MFY24 at Rs14.3bn vs. Rs5.7bn in FY23. (2) NWC at 37 days (TTM sales) as on Q3 vs. 42 days YoY. (3) Capex in 9M at Rs5bn vs. FY24E guidance of Rs6bn.

Maintain REDUCE with a revised target price of Rs1,160

We expect HAVL to post 14% revenue CAGR over FY23-26E while earnings CAGR will be 21% on a low base. We maintain REDUCE as (1) consumer demand remains soft and competitive intensity is elevated in FMEG, (2) losses in Lloyd will continue for foreseeable future while its share in total sales mix will rise with addition of new products and (3) stretched valuations.

Key concall takeaways

Financial and business outlook

- Seeing good traction in residential segment in urban areas for premium products. With expectation of inflation impact moderating, rural areas should also grow and will benefit mass/economy categories.
- Passed on cost increase due to energy label change in fans & AC, have seen margin rise over the past one year.
- Have seen stronger brands gaining more market share vs. regional/unorganized brands in electrical and durable categories.
- Consumers are upgrading their purchase in many FMEG categories from basic functionality to better convenience.
- Havells is putting lot of thrust on premiumization and cost initiatives. Key cost levers are raw material cost and operational efficiency.
- Not seen any issue due to Red Sea conflict, neither on exports nor on supply chain of imports.
- FMEG margin can improve from this level despite higher competition.
- Higher advertising spends impacted EBIT.

Lloyd

- For AC, expect good summer season due to pent-up demand from last year's truncated summer.
- Shelf filling in AC sales for upcoming summer is lower so far than last year.
- For international market, product modification investment will not be very high. It will be a long term journey towards brands and distribution. Primary focus is on Lloyd brand, but not averse to white label manufacturing.
- In Middle East also, Lloyd will be positioned as mass premium brand. NRI population will be main target audience (Lloyd is a market leader in Kerala). There are Chinese brands also operating in Middle East.
- Lloyd capacity utilization is 50-60%. Balancing production at both plants Gehlot and Sri City.
- Industry-wide new capacity coming up in AC is unlikely to lead to any significant price war as all main brands are seasoned players and are looking at long term opportunities.
- Lloyd's margin and market share are similar on e-commerce and offline.
- Lloyd 30-35% sales will be through channel financing.
- Compressor is a consolidated industry in terms of suppliers. With Lloyd's volume rising, they will be able to get better price from suppliers of compressor and motors.
- Refrigerator plant is still under evaluation

Lighting and ECD

- Lighting volume growth was healthy in both B2C and B2B. Lighting margin have normalized.
- Lighting capex is done post the fire incident last year. Higher quantum of production is moved in-house.
- Fans posted de-growth in Q3 on higher base of last year.
- Compared to last year, channel inventory is lower in Fans. Expect growth to be better in summer on low base and normalcy in pricing post non-BEE fans liquidation by trade.
- Small domestic appliances sales benefited from festive demand.

Cables and Switchgears

- Cables margin was lower due to product mix. Wires margin are higher, but in Q3 its share in total sales was lower.
- Capacity of under-ground cables will rose by 25% post commissioning of new Rs3bn plant.
- Sales mix is 60-65% house wires and 35-40% cables. Don't see a structural shift in this mix.
- Havells has not lost market share in switchgears. Growth in project and retail sectors is healthy but lower sales in telecom OEM sector and exports has curtailed overall growth. Don't have capacity constraints in switchgears.

The projections and forecasts described in this report were based upon a number of estimates and assumptions and are inherently subject to significant uncertainties and contingencies. Projections and forecasts are necessarily speculative in nature, and it can be expected that one or more of the estimates on which the projections and forecasts were based will not materialize or will vary significantly from actual results, and such variances will likely increase over time. All projections and forecasts described in this report have been prepared solely by the authors of this report independently of the Company. These projections and forecasts were not prepared with a view toward compliance with published guidelines or generally accepted accounting principles. No independent accountants have expressed an opinion or any other form of assurance on these projections or forecasts. You should not regard the inclusion of the projections and forecasts described herein as a representation or warranty by or on behalf of the Company, Centrum, the authors of this report or any other person that these projections or forecasts or their underlying assumptions will be achieved. For these reasons, you should only consider the projections and forecasts.

The price and value of the investments referred to in this document/material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance. Future returns are not guaranteed and a loss of original capital may occur. Actual results may differ materially from those set forth in projections. Forward-looking statements are not predictions and may be subject to change without notice. Centrum does not provide tax advice to its clients, and all investors are strongly advised to consult regarding any potential investment. Centrum and its affiliates accept no liabilities for any loss or damage of any kind arising out of the use of this report. Foreign currencies denominated securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of or income derived from the investment. In addition, investors in securities such as ADRs, the value of which are influenced by foreign currencies effectively assume currency risk. Certain transactions including those involving futures, options, and other derivatives as well as non-investment-grade securities give rise to substantial risk and are not suitable for all investors. Please ensure that you have read and understood the current risk disclosure documents before entering into any derivative transactions.
